DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, 11-16 and 21-26, drawn to a method/system for indexing a motion video, classified in class 707, subclass 200.
- II. Claims 7-10, 17-20 and 27-30, drawn to a method/system for sharing motion video, classified in class 725, subclass 93.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable.

In the instant case, subcombination I has separate utility such as a system allowing a user to index portions of a motion video in a database that associates specified portions of the video to data in the database representative of the motion video (e.g. touchdown pass). See MPEP § 806.05(d).

Subcombination II has separate utility such as a system allowing a user to share/distribute video with multiple users. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.
